1. Parents/students sign into MySchoolBucks.
2. After signing in, parents/students should select School Store > Browse All Items

The AP items are visible on the next page.

3. Select AP Exam Full Cost ($94 per exam). DO not use the AP Exam Deposit. This was just for 1st semester courses.
4. Students taking multiple exams will need to enter the quantity of exams they are taking. This should then change the amount due.
5. Parents with multiple students taking AP exams will have to repeat the process for each student.
6. If the student had first semester AP classes they should have already done this back in November. To update the number of exams, they should include the total number of exams being taken for all AP classes.

1. Example – The student had 2 AP classes first semester and is taking both exams. This semester the student also has 2 AP classes but is only taking one of the exams. The total number of exams would be 3 and the parents should pay for the three exams. If they’ve already paid for the first 2 exams, they only need to pay for the one additional exam. If they paid a deposit on the first 2 exams, they will need to pay for the remainder of those exams and well as the cost for the 3rd exam.
